Office Automation: Microsoft office.
Technologies CMS : WordPress, Blogger.
Virtualization and containerization : Docker, VMware, VirtualBox.
Automation : n8n, OpenAi Token.

Skills in the Process of Learning:

Big Data : Hadoop**. Data Analysis. Artificial intelligence :** GenAI. **DevOps**: Continuous Integration, Continuous Deployment

EDUCATION:

National School of Applied Sciences - Kenitra
Specialized Master's degree in Digitalization and IT Architecture (continuing education) - Bac+5 level (2024 - 2026) **Modules** : NoSQL | Information System | MERN | Big Data | Agile | DevOps | GenAI | Data Analysis | Soft skills .

National School of Applied Sciences - Kenitra
Specialized university degree in computer engineering and digitalization (continuing education) - Bac+3 level (2023 - 2024). **Modules** : POO | PHP | Laravel | Django | MySQL | Artificial intelligence | Virtualisation | Cloud Computing | Network.

Specialized Institute of Applied Technology - Bouznika
Specialized Technician Diploma in Computer Development - Bac+2 level (2020-2022) **Modules** : Algorithm | Asp | Python | SQL Server | Html | Css | JavaScript | .Net | Merise | Preparing a web project | Entrepreneurial culture | UML.

Ocean Atlantic High School - Casablanca
baccalaureate in physical sciences 2018 - 2019

COMPLETED PROJECTS:

Automating customer service via WhatsApp with AI chatbot: Implementation of an intelligent system for automating customer responses on WhatsApp using an AI-powered chatbot, using n8n

Real Estate Application Development: Creation of a real estate web application for managing and viewing property listings, allowing users to publish, search, and view properties for sale or rent, with authentication, result filtering, and Google Maps integration, using Nodejs, React.js and Tailwind CSS.

Development of an absence management application: Creation of a web application for managing student absences, allowing for absence recording, permission tracking, and report generation. The application integrates a modern user interface with React.js for the frontend and uses Spring Boot for the backend, with a MySQL database for data storage.

Development of an event management application: Creation of a web application for planning, organizing, and managing events. The application allows organizers to create events and manage registrations, while participants can view details, register online, and receive confirmations. Developed using Laravel and Tailwind CSS.

Development of a web platform for selling books: Implementation of a web platform dedicated to book sales, with catalog and user management, using jQuery, Node.js, et MongoDB.

Development of an application for managing complaints: Design and development of a web application to manage and track customer complaints, with an interactive dashboard and analytical features, using Bootstrap, LaravelSpatie, and MySQL

Creating a WordPress chatbot plugin: Development of a WordPress plugin to integrate an interactive chatbot, using PHP, AJAX, HTML and CSS. The chatbot answers frequently asked questions from visitors, with a simple and customizable interface.
